

# TECHNICAL SPECIFICATION

The SHOCK-WBV: C-series is designed specifically to reduce Whole Body Vibration (WBV) and increase comfort for commercial and leisure boat users. The system offers built-in lateral stability for superb levels of comfort.

# C SERIES

TRAVEL	VERTICAL	HORIZONTAL	UNIT WEIGHT
<b>84mm</b>	<b>72mm</b>	<b>43mm</b>	<b>7.4kg</b>

Suitable for boats on inland and coastal waters.

The C-series now comes with FOX Float EVOL Shock absorbers fitted as standard.

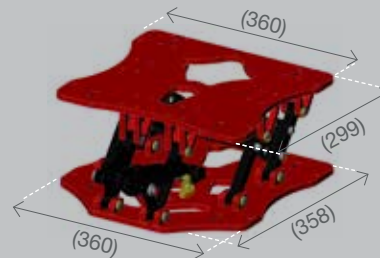

**SHOCK-WBV**      **FOX Float EVOL Shock**

We installed eight SHOCK-WBV units as they have no play or unwanted lateral movement and were the only units where we didn't suffer from sea sickness.

**Vessel Engineer**  
**Major European Coastguard**

Overall dimensions and fixing positions (mm):

Heights and movements (mm):

All SHOCK-WBV parts and designs are rigorously tested with hundreds of hours on the water, and on Sea Sure's ISO drop test rig, giving utmost confidence in SHOCK-WBV's seat suspension system.
